

## AUTUMN SCHOOL IA2

### AI and the Management of Heterogeneous Information and Data

October 30 - November 03, 2023

Le Lazaret, Sète (France)

<https://sites.google.com/view/autumn-school-ia/>

#### Introduction

The Autumn School in Artificial Intelligence (IA2) aims to provide high-level courses in the various techniques used in artificial intelligence. This 2023 autumn school edition concerns **the management of heterogeneous and imperfect information and data**. It is well known that companies, as well as public institutions, increasingly have to deal with a large amount of information/data of a different nature and from multiple sources. Alongside the notion of data, there are also constraints, knowledge and preferences that are often under-exploited in real applications.

#### Program

The program of this school spread over 5 days (from Monday October 30th to Friday November 3rd), is mainly composed of fundamental courses (mornings) supplemented by advanced presentations (afternoons) on specific subjects. The program also contains presentations on applications/case studies/projects as well as a special session, in the form of posters and short talks, for doctoral students.

#### Venue

This autumn school will take place in domaine du Lazaret in the city of Sète (south of France).

#### Registration

Registration fees include all services (accommodation, meals, coffee breaks). Accommodation is scheduled from Sunday October 29 to Friday November 3.

- PhD students, students: 350 euros (double room) or 650 euros (single room).
- Academics (non-CNRS staff): 525 euros (double room) et 650 euros (single room).
- CNRS staff (proof will be requested) : Free.
- Companies : 1000 euros (single room).
