Final Call for Papers
KROW 2008: September 17, 2008
Knowledge Representation Ontology Workshop
A KR 2008 Workshop

Sydney, Australia, September 16 - 19, 2008
http://www.cse.unsw.edu.au/∼kr2008/krow.html

KROW 2008 is one of two workshops forming an integral part of the KR 2008 program. It is a continuation of the Australasian Ontology Workshop series. The primary aim of the workshop is to bring together active researchers in the broad area of ontologies. We invite submissions on all aspects of ontologies. Possible topics include:

Topics of interest include:

- Ontology models and theories
- Ontologies and the Semantic Web
- Interoperability in ontologies
- Ontologies and Multi-agent systems
- Description logics for ontologies
- Reasoning with ontologies
- Ontology harvesting on the web

- Ontology of agents and actions
- Ontology visualisation
- Ontology engineering and management
- Ontology-based information extraction and retrieval
- Ontology merging, alignment and integration
- Web ontology languages
- Formal concept analysis and ontologies

Proceedings

The proceedings of the three workshops in the AOW series were published as volumes 58, 72, and 85 of the Conferences in Research and Practice in Information Technology series (http://crpit.com), and the KROW 2008 proceedings will be published as volume 90 of the same series. Extended versions of selected papers will appear in a special issue of the journal Applied Artificial Intelligence.

Submission Information

Submission is via EasyChair at http://www.easychair.org/conferences/?conf=krow2008.

Submission information such as format, page limits, etc. can be found on the CRPIT website: http://crpit.com/AuthorsSubmitting.html.

Important Dates

Paper submission deadline: June 1, 2008
Notification of acceptance: July 1, 2008
Camera-ready copies due: July 15, 2008
KROW 2008: September 17, 2008

Workshop Chairs
Thomas Meyer (Meraka Institute, South Africa)
Mehmet Orgun (Macquarie University, Australia)
